

INDEX.

A

	PAGE
Accuracy in dies.....	86
Aluminum.....	95
for cooking utensils.....	192
coins and medals.....	228
American gauges.....	99, 103
Railway Mast. Mech. Asso.....	112
Soc. of Mechanical Engineers.....	112
Anatomy of presses.....	20
Annealing metals.....	120
for drawing.....	192
Anvil principle.....	38
and hammer.....	16
Armature disks.....	139
Artistic design in presses.....	36
metal-working.....	13
Art of metal-work, origin and history.....	II, 14
Assembling work in dies.....	162
by curling.....	172, 173, 174
Attaching dies.....	77
Automatic machines.....	246

B

Bar metals.....	65
Belts, horse-power of.....	260
Bending processes.....	154
in dies.....	154
Bevel of cutting-edges.....	145
Blank dimensions.....	204
formulæ.....	206, 207
Blank-holders.....	196
vee.....	219
multiple.....	219
Blanks, a museum of.....	136, 137

	PAGE
Blanks and margins.....	131
Blank sizes, mensurative finding.....	206
gravitative finding.....	205
tentative finding.....	205
Blows, hammer.....	254
Body-wrinkles.....	194
systematized.....	195
Bolsters for presses.....	76
Brass.....	95
Brick presses.....	230
Britannia.....	95
Broaching.....	218
Brown & Sharpe gauge.....	110
Bubble-blowing.....	166
Burs in shearing and punching.....	126
Buying metals.....	97
presses.....	35

C

Cartridge re-drawing.....	240
Carlyle, Thomas.....	98
Carriage-feeding.....	239
Casting punches in place.....	164
under pressure.....	12
Chart of gauges, Wheeler's.....	100
Cheapening utensils by drawing processes.....	222
Chiseling.....	123
cutters for paper, angle of.....	253
dies.....	124
Chucks, for dies.....	81
Clamping pads in shearing.....	146
dies.....	78, 85
Classification of presses.....	20
Clearance in cutting dies.....	143
Clutches.....	39
Coining coins.....	225
presses.....	67, 68
flow in.....	227
presses.....	231
press, quick-running.....	231
pressures.....	231
processes.....	223
speeds.....	231
Coins of aluminum.....	228
reeding of.....	226

	PAGE
Coins, ejecting.....	225
fins upon.....	227
milling of.....	226
Cold flow of solids.....	188
Columnar presses.....	24
Combination cutting.....	138
Commercial metals.....	95, 96, 97
Composite press frames.....	24
Compressing plastic substances.....	229
Conical drawing.....	190
Copper.....	95
Corks rising through pitch.....	189
Cranks and cams.....	64
Curling and seaming processes.....	167
assembling by.....	172, 173, 174
by rolling.....	210
dies.....	168
in horning presses.....	60, 61
inwardly.....	171
irregular.....	173
or wiring presses.....	182
outwardly.....	167
pressures.....	182
principles of.....	175
processes.....	167
speeds.....	182
straight work.....	179
tapered work.....	169, 170
Cutting die qualifications.....	142
dies.....	130
-drawing-embossing.....	199
edge bevells.....	145
-forming-embossing.....	159, 160
presses.....	50, 56
pressures.....	148
processes.....	123
speeds.....	147
with gang-dies.....	138

D

Dangers of press-feeding.....	234
Decimal-gauge notch sizes proposed.....	177
Deepening process.....	214
Deep punching.....	133

	PAGE
Depth of drawing.....	192
Design in machinery, artistic principles.....	192
Diagrams of press motions.....	29, 30, 31
Dial and roller feed combined.....	240
Dial-feeding.....	239
Die chucks.....	81
clamps.....	78, 48
gauges.....	177
hardness.....	143
interchangeability.....	76
knockouts.....	161
lubrication.....	92
nomenclature.....	93
pressures in cutting.....	148
sexes.....	93
sharpenings.....	142
specimens, pictures of.....	87, 88, 89, 90
speeds in cutting.....	147
work manifolding.....	249
Dies, accuracy and durability.....	86
attaching to pieces.....	77
classified by functions.....	75
comparative cost of.....	87
composite construction of.....	88
cutting-forming-embossing.....	159, 160
definitions and evolutions.....	73
for cutting and punching.....	131
for cutting successively.....	131, 149
for curling or wiring.....	168
for double curling.....	171
for shearing.....	124, 125
for assembling work.....	162
for bending.....	154
for chiseling.....	124
for embossing.....	158
testing fit of.....	159
for forming.....	155, 156
functions.....	93
height of.....	91
Dip or shear.....	126, 127
Double-action presses.....	62, 63, 65
-crank presses.....	52, 53
curling dies.....	171
Drawing, annealing for.....	172
conditions of dies for.....	198
conical.....	190

	PAGE
Drawing, defined.....	185
depth of.....	192
historically.....	184
mammoth work.....	222
mechanics of.....	186
presses.....	62, 63, 65, 212
pressures.....	210
process analogies.....	189
processes.....	184
prophetically.....	222
speed.....	210
of.....	190, 217
springing of tools in.....	210
spring.....	203
with cutting and embossing... ..	199
Drawn-work, lubrication of.....	199
manifolded.....	197
proportions.....	196
specimens of.....	201
temperature of.....	199
Drifting or re-punching.....	136
tools.....	136
Driving by electricity.....	259
Drop forging.....	223
fins on.....	224
trimming of.....	224
presses.....	26, 47, 48
press pressure, effective.....	225
Drop-presses, stored energy.....	257
Duplication in die-work.....	73
by press-work.....	13
Durability in dies.....	86

E

Ejecting coins.....	225
Ejectors.....	243
Electric driving.....	259
Embossing in dies.....	157
presses.....	54, 55
with cutting and drawing.....	199
speeds.....	161
pressures.....	161
Energy, stored.....	257
English presses.....	43

	PAGE
European gauges.....	102, 105
Evans, Mr.....	67

F

Feeding attachments.....	233
by grip devices	238
by gravity.....	243
by hand.....	234
by rollers.....	236
by reels.....	237
by revolving dials.....	239
by sliding carriages.....	239
presses	233
speeds	234, 245
Feeders.....	233
Feeds.....	233
indexing.....	242
Fins in coining.....	227
on drop forgings.....	224
Fiddle principle.....	38
Flanges, internal.....	157
Flange wrinkles.....	195
Flatness of work after punching.....	132
Flow of glaciers.....	188
of solids, elastic.....	188
of solids.....	13, 161
of metals.....	188
in coining.....	227
of solids, not elastic.....	188
Fluid punches.....	165
Foolishness in wire-gauges.....	100
Foot-presses.....	46, 57
Foreign presses.....	43
Forging processes.....	12
by slow pressure.....	257
Forming in dies....	155, 166
pressures.....	161
speeds.....	161
Frame design of presses	22
Franklin Institute.....	188
Friction-dials.....	241
Fruit-can tops.....	142
Functions of presses.....	34
of dies.....	75
Future development of press-work.....	261

G

	PAGE
Gang cutting or punching.....	138
Gas-hammers.....	71
Gauge, a proposed new.....	112, 113
decimal.....	112, 113
nomenclature.....	104
numbers, qualifications of.....	116
modifications.....	108
micrometer.....	119, 120, 121
Gauges for metals.....	98
Gauging in dies.....	147
German presses.....	43
Glass-blowing.....	166
Glacial flow.....	188
Gold.....	75
Graphic analysis in drawing.....	187
Gravity-feeding.....	243
Grip-feeding.....	238
Grosjean, Mr.....	184

H

Hammer-blows.....	254
Hammering machines.....	70, 71
Hand feeding.....	233
presses.....	44, 45
Hardness of dies.....	143
Hold-downs and strippers.....	145
Hoopes & Townsend.....	134
Horning or side seaming.....	179
and curling presses.....	60, 61
Horse-power of belts.....	260
Hot forging, rapidity of.....	255
Hydraulic presses.....	69, 78

I

Indexing feeds.....	242
Inclined presses.....	47, 50, 51
Internal forming.....	157
Inventing wire-gauges.....	98
Inverted, re-drawing.....	216
Involuntary processes.....	162
Inward curling.....	171
International gauges.....	111
Irregular curling.....	173
Iron.....	95

K

	PAGE
Kinetic construction of presses.....	28
Knockouts	243
portable.....	244
in dies.....	161

L

Lead.....	95
pipe squirting.....	230
Lever presses.....	46, 47
Limit in depth of drawing	192
Literature of presses.....	42
Lock-seams	180
Lower and upper dies.....	93
Lubrication of dies and materials.....	92

M

Machines, automatic.....	246
Machine-tool analogies.....	37
Mammoth drawing processes.....	222
Manifolding in paper-cutting.....	254
work in dies.....	249
Marchand, Mr.....	184
Margins and blanks	131
Materials and measurements.....	95
worked in presses.....	34
Measurement of materials.....	95
Mechanics of drawing	186
Medals.....	226
Metal buying.....	97
Micrometer gauges	119, 120, 121
Milling coins.....	226
Mints.....	67
Motions of presses.....	20
Multiple drawing.....	197
Museum of blanks.....	136, 137
presses.....	42
Mutilation by press-feeding.....	235

N

Name-guessing for presses.....	34
Neck-reducing	221

	PAGE
Neidringhaus, Mr.....	184
Nickel.....	95
Nomenclature of dies.....	93

O

Outward curling.....	167
----------------------	-----

P

Paper cutting manifolded	254
working.....	250
working pressures.....	253
Patenting old processes.....	217
Pendulum presses.....	46, 47
Perforated metal.....	138
Pictorial collection of presses.....	43
Piping in forgings.....	255
Planchets for coins.....	225
Plastic substances, compression and molding of.....	229
Platinum.....	95
Power applications to presses.....	33
press problems.....	37
required for presses.....	260
Position of presses.....	20
Portable knockouts.....	244
Press bolsters.....	76
buyers, points for.....	35
classification and anatomy.....	20
classification by functions.....	33
by frame design.....	22
by kinetic construction.....	28
by materials worked.....	34
by method of support.....	27
by motions.....	20
by position.....	20
construction, primal principles.....	17
definitions.....	16
reading, definitions of.....	233
literature.....	42
nomenclature.....	18
work, future development of.....	261
working, principles of.....	12
Presses, coining.....	67, 68
cutting.....	50, 51

	PAGE
Presses, drawing.....	62, 63, 65, 212
double-action.....	62, 63, 64
double-crank.....	52, 53
drop.....	48, 49
embossing.....	54, 56
foot.....	46, 57
for brick.....	230
for curling or wiring.....	182
for cutting.....	153
for forming and embossing.....	166
for re-drawing.....	221
for seaming.....	182
for horning.....	183
for soap.....	230
hand.....	44, 45
hydraulic.....	69, 70
inclined.....	47, 50, 51
lever.....	46, 47
pendulum.....	46, 47
power for.....	260
punching.....	54, 56
qualifications.....	16
re drawing.....	64, 66
reducing.....	64, 66
safety devices.....	234, 235
screw.....	44, 45
toggle.....	62, 63, 65, 67, 68
twinned.....	52, 53
wiring.....	60, 61
Pressure for coining.....	231
for drawing.....	210
for cutting dies.....	148
for paper-working.....	253
in drop presses, effective.....	251
in forming and embossing.....	161
with loose punches.....	135
Primeval methods.....	I, 14
Principles of curling.....	175
Proportions for drawn-work.....	196
Prussian system of drawing.....	184
Punches.....	93
and shears.....	57, 58
fluid.....	165
of soft metal.....	164
Punching.....	129
presses.....	54, 56
pressure reduced.....	135

	PAGE
Punching tapering holes	134
Punchings or wads.....	131
Pushouts.....	245

Q

Quick-running coining-presses	231
-------------------------------------	-----

R

Rams of presses.....	19
heights from beds.....	91
cross-sections.....	24, 25
Rapidity in hot forging.....	255
Re-drawing presses.....	64, 66, 221
pressures.....	221
processes.....	214
speeds.....	221
upside down.....	216
Reducing necks.....	221
presses.....	64, 66
processes.....	214
Reeding coins.....	226
Reel-feeding.....	237
Re-punching or drifting.....	136
Rim-covers.....	220
forming.....	220
Riveting.....	229
Roller and dial feed combined.....	240
curling.....	210
feeding.....	236
spinning.....	210
Rotary operations.....	15

S

Safety devices for presses.....	235
Screw-presses.....	44, 45
Seams, special.....	181
Seaming or horning presses.....	183
pressures.....	182
processes.....	167
speeds.....	182
Sexes of dies.....	93
Shapes of bar metals.....	97

	PAGE
Sharpening dies by hammering.....	143
Shear-blades.....	84
Shear or dip	126, 127
Sheared surfaces, imperfect.....	135
Shearing as affected by dies.....	150
dies.....	124, 125
presses	27
strength of various metals.....	149
Shears and punches.....	57, 58
squaring	47, 48, 52, 53
Sheet-metal gauged by weight.....	108
Sheet-metals.....	96
Side-seaming or horning.....	179
Silver.....	95
Soap-presses.....	230
Soft punches.....	164
Special automatic machines.....	246
machinery.....	246
machines, inventors of.....	247
seams.....	181

Speed in forming and embossing.....	161
Speed of drawing.....	190, 210
Speeds for cutting-dies.....	147
for seaming.....	182
in coining.....	231
for curling.....	182
for re-drawing	221
in drawing.....	210
Spinning by rolling.....	210
Spring-drawing.....	203
Springing of work after bending.....	154
of tools in drawing.....	210
Sprue-cutting.....	125
Squaring shears.....	47, 48, 52, 53
Squirting of soft metals.....	230
Stamping process.....	184
Steam-hammers.....	71
Steel.....	95
Stones sinking through pitch	189
Stored energy in drop-presses.....	257
Straight curling	179
Strength of metals, shearing.....	149
of materials in drawing.....	193
in drawing comparative.....	198
Strippers and hold-downs.....	145
Strouvelle Bros.....	184

	PAGE
Sub-presses.....	40
Successive cutting.....	139
dies.....	139, 141
gang-cutting.....	140, 141
Suicidal press tendencies.....	39
Supporting presses, methods of.....	27

T

Tapering holes, punched.....	134
Temperature of material.....	248
Tensile strength in drawing.....	193
Testing die sharpness.....	134
fit of embossing dies.....	159
pressures.....	258
Thickness of tin-plate.....	107
Throats of presses.....	18
Tin-plate.....	95
thickness.....	107
Toggle-presses.....	62, 63, 65, 67, 68
Topography of machinery.....	19
Trimming drop-forgings.....	224
edges.....	209
Trip-hammer work.....	256
Tubal Cain and disciples.....	11
Tube feeds.....	243
squirting.....	230
Twin presses.....	52, 53
Tyndall, Prof.....	189

U

Upper and lower dies.....	93
---------------------------	----

V

Vee blank-holders.....	219
------------------------	-----

W

Warping in forming and embossing.....	162
Weighing-bolsters.....	259
Wet-paper test.....	134
Wheeler, Dr. S. S., gauge charts by.....	100

	PAGE
Whitworth, Sir Joseph	12, 106
